

## His-Tag Rabbit pAb Cat No: HR1APEA004

For research use only

## **Overview**

| Product Name             | His-Tag Rabbit pAb  |
|--------------------------|---|
| Source                   | Rabbit  |
| Applications             | WB  |
| Species Reactivity       | N/A   |
| Recommended<br>Dilutions | WB 1:5,000  |
| Immunogen                |   |
| Species                  | Rabbit  |
| Storage                  | PBS with 0.02% sodium azide and 50% glycerol pH 7.4. Store at -20°C. Avoid repeated freeze-thaw cycles.   |
| Isotype                  | IgG   |
| Clonality                | Polyclonal  |
| Concentration            | 1mg/ml  |
| Observed band            | N/AkDa  |
| GeneID?Human?            | N/A   |
| Human Swiss-Prot<br>No.  |   |
| Cellular localization    |   |
| Alternative Names        | N/A   |
| Background               | A polyhistidine-tag is an amino acid motif in proteins that consists of at least five histidine (His) residues, often at the N- or C-terminus of the protein. Monoclonal antibodies specific to six histidine tags can greatly improve the effectiveness of several different kinds of immunoassays, helping researchers identify, detect, and purify polyhistidine fusion proteins in bacteria, insect cells, and mammalian cells. |
