

Bcl-7a Polyclonal Antibody

Cat No: HR1AP8164

For research use only

Overview

Product Name	Bcl-7a Polyclonal Antibody
Source	Rabbit
Applications	WB,ELISA
Species Reactivity	Human,Mouse
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	22kDa
GenID?Human?	BCL7A
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	BCL7A; B-cell CLL/lymphoma 7 protein family member A
Background	BCL tumor suppressor 7A(BCL7A) Homo sapiens This gene is directly involved, with Myc and IgH, in a three-way gene translocation in a Burkitt lymphoma cell line. As a result of the gene translocation, the N-terminal region of the gene product is disrupted, which is thought to be related to the pathogenesis of a subset of high-grade B cell non-Hodgkin lymphoma. The N-terminal segment involved in the translocation includes the region that shares a strong sequence similarity with those of BCL7B and BCL7C. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008].
