

HDAC8 (phospho Ser39) Polyclonal Antibody

Cat No: HR1AP2436

For research use only

Overview

Product Name	HDAC8 (phospho Ser39) Polyclonal Antibody
Source	Rabbit
Applications	WB,IHC-p,ELISA
Species Reactivity	Human,Mouse,Rat
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	kDa
GeneID?Human?	HDAC8
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	HDAC8; HDACL1; CDA07; Histone deacetylase 8; HD8
Background	histone deacetylase 8(HDAC8) Homo sapiens Histones play a critical role in transcriptional regulation, cell cycle progression, and developmental events. Histone acetylation/deacetylation alters chromosome structure and affects transcription factor access to DNA. The protein encoded by this gene belongs to class I of the histone deacetylase family. It catalyzes the deacetylation of lysine residues in the histone N-terminal tails and represses transcription in large multiprotein complexes with transcriptional co-repressors. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Oct 2009],
