

Granzyme H Polyclonal Antibody

Cat No: HR1AP6818

For research use only

Overview

Product Name	Granzyme H Polyclonal Antibody
Source	Rabbit
Applications	WB,IHC-p,IF,ELISA
Species Reactivity	Human
Recommended Dilutions	
Immunogen	
Species	Rabbit
Storage	-20°C/1 year
Isotype	
Clonality	
Concentration	1 mg/ml
Observed band	23kDa
GeneID?Human?	GZMH
Human Swiss-Prot No.	
Cellular localization	
Alternative Names	GZMH; CGL2; CTSG2; Granzyme H; CCP-X; Cathepsin G-like 2; CTSG2; Cytotoxic T-lymphocyte proteinase; Cytotoxic serine protease C; CSP-C
Background	granzyme H(GZMH) Homo sapiens This gene encodes a member of the peptidase S1 family of serine proteases. Alternative splicing results in multiple transcript variants, at least one of which encodes a preproprotein that is proteolytically processed to generate a chymotrypsin-like protease. This protein is reported to be constitutively expressed in the NK (natural killer) cells of the immune system and may play a role in the cytotoxic arm of the innate immune response by inducing target cell death and by directly cleaving substrates in pathogen-infected cells. This gene is present in a gene cluster with another member of the granzyme subfamily on chromosome 14. [provided by RefSeq, Nov 2015],
