

## Elongin A2/3 Polyclonal Antibody Cat No: HR1AP7615

For research use only

## **Overview**

| Product Name             | Elongin A2/3 Polyclonal Antibody   |
|--------------------------|--|
| Source                   | Rabbit   |
| Applications             | IF,ELISA   |
| Species Reactivity       | Human  |
| Recommended Dilutions    |  |
| Immunogen                |  |
| Species                  | Rabbit   |
| Storage                  | -20°C/1 year   |
| Isotype                  |  |
| Clonality                |  |
| Concentration            | 1 mg/ml  |
| Observed band            | kDa  |
| GeneID?Human?            | TCEB3B/TCEB3C  |
| Human Swiss-Prot<br>No.  |  |
| Cellular<br>localization |  |
| Alternative Names        | TCEB3B; TCEB3L; RNA polymerase II transcription factor SIII subunit A2; Elongin-A2; EloA2; Transcription elongation factor B polypeptide 3B; TCEB3C; TCEB3L2; RNA polymerase II transcription factor SII   |
| Background               | transcription elongation factor B subunit 3B(TCEB3B) Homo sapiens This gene encodes the transcriptionally active subunit of the SIII (or elongin) transcription elongation factor complex, which also includes two regulatory subunits, elongins B and C. This complex acts to increase the rate of RNA chain elongation by RNA polymerase II by suppressing transient pausing of the polymerase at many sites along the DNA template. Whereas a related protein with similar function, elongin A, is ubiquitously expressed, the encoded protein is specifically expressed in the testis, suggesting it may have a role in spermatogenesis.
