

p73 Polyclonal Antibody

Cat No: HR1AP5185

For research use only

Overview

| | |
|-----------------------|--|
| Product Name | p73 Polyclonal Antibody |
| Source | Rabbit |
| Applications | WB,ELISA |
| Species Reactivity | Human,Mouse,Rat |
| Recommended Dilutions | |
| Immunogen | |
| Species | Rabbit |
| Storage | -20°C/1 year |
| Isotype | |
| Clonality | |
| Concentration | 1 mg/ml |
| Observed band | 70kDa |
| GenID?Human? | TP73 |
| Human Swiss-Prot No. | |
| Cellular localization | |
| Alternative Names | TP73; P73; Tumor protein p73; p53-like transcription factor; p53-related protein |
| Background | tumor protein p73(TP73) <i>Homo sapiens</i> This gene encodes a member of the p53 family of transcription factors involved in cellular responses to stress and development. It maps to a region on chromosome 1p36 that is frequently deleted in neuroblastoma and other tumors, and thought to contain multiple tumor suppressor genes. The demonstration that this gene is monoallelically expressed (likely from the maternal allele), supports the notion that it is a candidate gene for neuroblastoma. Many transcript variants resulting from alternative splicing and/or use of alternate promoters have been found for this gene, but the biological validity and the full-length nature of some variants have not been determined.
