

# PKD1 (phospho Ser910) Polyclonal Antibody

Cat No: HR1AP7896

For research use only

## Overview

|                       |                                                                                                                                                                                                                                                                                                                                                                                                          |

| Background            | protein kinase D1(PRKD1) Homo sapiens PRKD1 is a serine/threonine kinase that regulates a variety of cellular functions, including membrane receptor signaling, transport at the Golgi, protection from oxidative stress at the mitochondria, gene transcription, and regulation of cell shape, motility, and adhesion (summary by Eiseler et al., 2009 [PubMed 19329994]).[supplied by OMIM, Nov 2010], |
