Description	CLK/STY is a member of the CDC2-like (or LAMMER) family of dual specificity protein kinases. The phosphorylated serine/arginine-rich (SR) proteins involves in the pre-mRNA processing and releasing through nucleus into nucleoplasm. CLK/STY, which could phosphorylates the specific SR proteins , such as ASF/SF2, may directly regulates the activity and compartmentalization of SR splicing factors .
Functions	The specific activity of CLK1 was determined to be 200 nmol /min/mg as per activity assay protocol.
