Description	NUAK1 or SNF1/AMP kinase-related kinase (SNARK) is a member of the NUA1 family of SNF1-like kinase 1 that is also known as AMPK-related protein kinase 5 (ARK5). ARK5 is a tumor cell survival factor that is activated by AKT and acts as an ATM kinase under conditions of nutrient starvation . NUA1 is highly expressed in heart and brain, and at lower levels in skeletal muscle, kidney, ovary, placenta, lung, and liver. NUA1 is involved in tolerance to glucose starvation and suppresses Fas-induced apoptosis by phosphorylation of CASP6, thus suppressing the activation of the caspase and the subsequent cleavage of CFLAR .
Functions	The specific activity of NUA1 was determined to be 50 nmol /min/mg as per activity assay protocol.
