

## Recombinant Human ROCK1 (N-GST tag)

Cat No:HR2R1922

For research use only

## Overview

Quantity	10 ?g
Gene Symbol	ROCK1
Gene ID	N/A
Accession	NM_005406
Alternative Name	P160ROCK; ROCK-I; ROKbeta
Species	Human
Source	
Description	ROCK1 is a ubiquitously expressed serine/threonine kinase that is a downstream target of the small GTPase RhoA. ROCK1 is involved in diverse cellular functions, including smooth muscle contraction, actin cytoskeleton organization, cell adhesion and motility, and gene expression . ROCK1 contributes to the development of cardiac fibrosis and induction of fibrogenic cytokines in cardiomyocytes in response to pathological stimuli. ROCK1 knockout mice exhibit reduced perivascular and interstitial fibrosis which is associated with reduced expression of a variety of extracellular matrix (ECM) proteins and fibrogenic cytokines .
Functions	The specific activity of ROCK1 was determined to be 65 nmol /min/mg as per activity assay protocol
Formulation	50mM Tris-HCI, pH 7.5, 150mM NaCI, 0.25mM DTT, 0.1mM EGTA, 0.1mM EDTA, 0.1mM PMSF, 25% glycerol.
Solubility	N/A
Appearance	Liquid
Molecular Weight	85
Purity	70% - 90%
Concentration	
Shipping Condition	Dry Ice
Storage Condition	Store product at ?70?C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.
